

ASTRALPOOL – INVERLONG

Complete treatment during winter

- Keeps the water crystal clear
- Prevents the water putrefaction and the proliferation of algae
- Easy to use, no product handling
- Favors the beginning of the bathing season

DOSAGE FLOAT	DURATION	ALL TYPES OF POOLS	DOSAGE
			1 dosage float / 50 m ³

PROPERTIES

Appearance	Bell-shaped base with perforable marks
Colour	Blue
Weight	2 kg

CHARACTERISTICS

This dispenser takes care of the pool during the winter season. It favors the cleaning, recovery and fine-tuning of the pool water at the beginning of the bathing season.

Doser containing disinfectant, flocculant and algicide products for pool maintenance during winter.

INSTRUCTIONS FOR USE

Punch the circular marks (on both sides) from 50 m³ to 200 m³ of water depending on the swimming pool volume. Punch a hole in the round marks with a sharp object (for instance a scissors) and you will easily obtain the necessary holes for water to get inside it.

Attention: Don't refill this dispenser. It is for one use only.

DOSAGE

Initial treatment: Add 15gr of ASTRALPOOL - ClorShock for each m³ of water. Wait for 2 hours before adjusting the pH level between 7,2 - 7,6 using either ASTRALPOOL - 10 pH Minus solid or ASTRALPOOL - 20 pH Plus solid.

The initial treatment should be repeated whenever the water does not appear transparent.

Maintenance treatment: Put the dispenser into the water and let it float. Maintain a residual chlorine concentration between 0,5-2 ppm. Approximate duration: 4 - 6 weeks.

These doses are the ones suggested and can be modified according to the own characteristics of every swimming pool, climate, etc.
