2026.03.20

1.1 Scuba S1/N1 2025 Function/APP Upgrade (No New SKU for 2026)

◆ Background

To enhance the market competitiveness and overall user experience of the Scuba S1/N1/N1 Plus (2025 models), the full release of the new app (V3.2.0) and the staged rollout of the firmware (V1.1.4.2) were completed on March 19, 2026. The full rollout of firmware to each user will be completed by March 30, 2026.

Upgraded Function

Clarification

Customized Scheduled Cleaning

It is improved from original Eco Mode. Users can set the cleaning duration (45 / 60 / 90 minutes) via the APP. The system then determines the maximum weekly cleaning frequency based on the selected duration (up to 4 / 3 / 2 times).

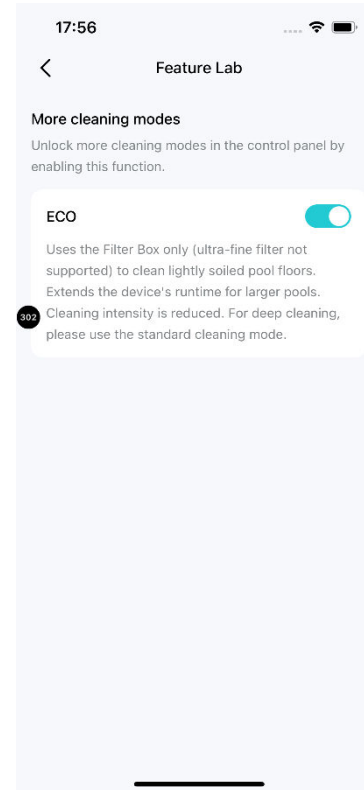

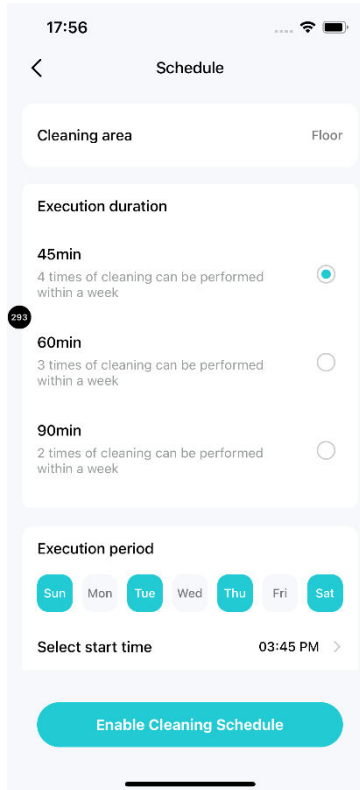

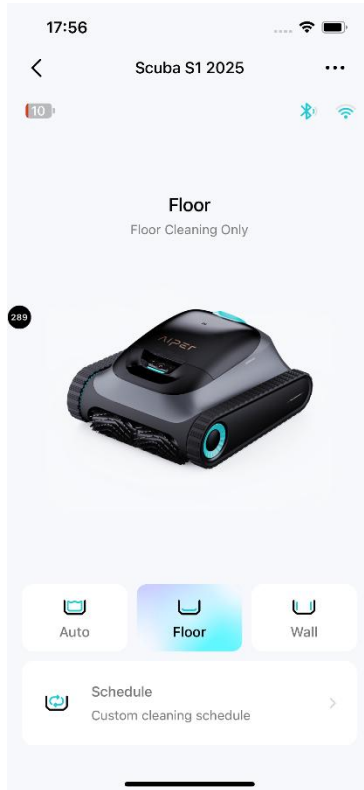

- Option 1: 45 min * up to 4 times per week
- Option 2: 60 min * up to 3 times per week
- Option 3: 90 min * up to 2 times per week

Eco Mode (Extended Battery Mode)

- 4-4.5 Hours Floor Cleaning
- Performs pool floor cleaning only
- Suitable for daily maintenance with light debris. Not for heavy debris conditions.
- The New Eco mode is different from the original Eco mode.

1.3 How to Access New Features

Upgraded Function

How to Activate or Access New Features

Customized Scheduled Cleaning

Use the APP to set the schedule cleaning. Once saved, the system will automatically override the original ECO mode, and the new mode takes effect.

Afterwards, pressing the fourth button on the device will start cleaning according to the newly set schedule.

Eco Mode (Extended Battery Mode)

Located in the "Lab Feature" section of the APP.

1.4 FAQ

1. Can the user with a 2025 model access these new features by updating the software?

Yes, these features will be available via update of firmware and APP for 2025 models.

2. What if the device is not bound to the APP or no customized schedule has been set?

The Scuba S1 will still follow the original ECO mode (automatically cleaning every 48 hours in one week).

3. Do users need to manually upgrade the firmware and APP in the app?

There are automatic updates, so no manual action is required. However, if automatic updates are turned off, users will need to update it manually.

A woman with long dark hair, wearing a yellow bikini, is swimming in a pool of clear blue water. She is in a freestyle stroke, with her arms extended forward and her head above water. The water is bright blue and has ripples on its surface. The overall scene is bright and summery.
